36 vladimir teplov highlighting andropov's recent stmt on

euromissiles, pointing out only way of preventing war and ensuring

peace for present and future generations is in reducing nuclear

and other weapons, not in piling them up, such as u.s. is doing

by commencement of deployment of new u.s. medium-range missiles

in western europe, criticizing u.s. for ignoring and rejecting

soviet union's constructive proposals at geneva, claiming substance

of reagan's policy is to upset existing balance of strength in

europe and achieve military superiority by deploying new missiles

close to ussr and its allies, stressing that soviet

counter-measures are being taken by deploying tactical missiles

in gdr and czechoslovakia. (4 min: engna 0001)
